

To whom it may concern:

Thank you for your efforts "to increase the number of LPFM stations on the air and strengthen the viability of those stations that are already operating." I appreciate low power FM - I listen to WPVM-LP in Asheville, NC every day. Both my home and my office are less than a mile from the station, and in my attempts to tune to 103.5, I frequently encounter massive interference from a commercial station out of Knoxville, TN, WIMZ. Please eliminate "third adjacent channel" spacing and allow WPVM to use contour protection so that I can hear my local community radio station with out commercial interference from another state! Please also allow LP stations to own translators so that WPVM can reach all of the areas of our mountainous community. Thank you!

E.M. Trigg
